

Project Overview

As of June 5, 2013

Stygler Road Improvements - Wendler Boulevard to Gahanna City Limit

Description and Benefits:

The project will realign Stygler Road between Wendler Boulevard in Columbus and 650 feet inside Gahanna. The curvature of Stygler south of Wendler will be reduced, allowing motorists to see oncoming traffic better and making this section of Stygler safer for everyone. Curbs and gutters will be added on both sides of Stygler and an *Americans with Disabilities Act*-compliant curb ramp will be built at Sandburr Drive. A retaining wall and sidewalk will be constructed on the west side of Stygler. Signage will be upgraded.

Construction Schedule and Access:

- Construction will be managed by the city of Columbus and is scheduled to begin June 17 and finish by September 2013, weather permitting.
- Access to all properties will be maintained during the work.
- **Drivers, bicyclists and pedestrians should expect detours.** Drivers and bicyclists wishing to reach Morse Road will need to travel west on Wendler Boulevard then turn south (left) on Hines Road, west (right) on McCutcheon Road and north (right) on Stelzer Road.

Cost:

Estimated construction cost: \$1.2 million

City of Columbus Contact Information:

April – May 2013:

Design Project Manager Mark Richard, P.E., tel. (614) 645-5675

June – September 2013:
